THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. Three underground offices have been constructed about one kilometer north of the Sinanju Airfield in North Korea in order to provide a secure place for airfield personnel to work during air raids. These underground offices have been built of reinforced concrete, and the tops have been camouflaged with mud and grass. They can accommodate a total of more than 100 working personnel, and are all equipped with electric and communications facilities for directing activities at the airfield. They have been built in the hilly area about 150 meters northeast of Hsiao Shanlits'un (小山里村) (? Sosanni-ch'on), a village of about 10 families one kilometer north of Sinanju Airfield. One office is at the foot of a comparatively higher hill in the rugged area northeast of Hsiao Shanlits'un; the second is about 40 meters to the left front of the first; and the third is about 25 to the right front of the first.
2. These underground offices can be identified as follows: Hsiao Shanlits'un is about one kilometer north of the Sinanju Airfield; from Hsiao Shanlits'un about 150 meters northeast is a heavily wooded area in which no houses exist in a radius of two to three hundred meters; there is a small river, which is often dried up showing a bed of white sand, about 50 meters due north of this rugged area. The underground offices are on a higher hill in this rugged area.
